MASTER KEY SYSTEMS

At Omega Security Solutions, we're proud to say that high-security master key systems are one of our great strengths. In fact we are one of the largest suppliers of restricted master key systems in Australia with over 15,000 systems in operation.

For 40 years, we have been specialising in the design and manufacture of high security master key systems, combining the latest technology in restricted key profiles, key duplication, software and architectural door hardware.

SECURITY SUPPORTED BY EXPERTISE

Using our coding and strategic design expertise, we work closely with an array of architects, builders, suppliers and clients alike to provide optimum keying solutions across a broad range of specifications and criteria.

HIGH SECURITY

All our high security systems feature long lasting legal and physical protection against unauthorized key duplication. We are also able to offer Security Construction and Equipment Committee (SCEC) endorsed key systems for Government departments and agencies.

BILOCK

- Easy to use with minimum maintenance
- Tamper Resistance: A high level of pick resistance
- Flexibility: Up to 17,000,000 combinations
- BiLock New generation & BiLock QCC can retrofit almost all hardware
- SCEC Endorsed

GENERATION 6

- Affordable key control
- Colour coded key inserts
- Suitable for retro fit installations

LOCKWOOD TWIN

- Protected by Patents
- High Security Keying System
- Pick and Drill Protection
- Colour Coded Key Inserts
- Large Master Keying Capabilities

ABLOY PROTEC

- New patented rotating disc mechanism
- Virtually pickproof
- No springs, pins or other parts to wear out
- Superior master-keying possibilities
- Resistant to both dirt and freezing
- Key blanks protected by world-wide patents
- SCEC Endorsed

GALAXY

- Retrofitting existing locks is quick and easy
- Key comes with a lifetime guarantee against breakage & is available in 21 different key head colours
- Keys & cylinders have been tested to 1,000,000 cycles.

KEY MANAGEMENT SOFTWARE

Omega's dedicated Key Management software the 'Omega Key Register' is a must for maintaining full control over key management and allocation. The importance and security significance of this task is often overlooked, and many organisations, despite having complex and expensive master key systems, have poor record keeping of who has which keys.

All of our key systems can be fully supported with the Omega Key Register Software. You can link directly with Omega (or any locksmith using Promaster Masterkeying) via the Omega Key Register software. This allows you to receive regular updates on keys that are manufactured, and it also allows electronic ordering of keys via email.
